PROFESSIONAL SUMMARY

Front-End Engineer with 4+ years of experience building scalable, production-ready web applications with React, Next.js, and TypeScript. Skilled in component-driven architecture, role-based access systems, and performance optimization, with a track record of delivering client-facing products end-to-end and collaborating across the stack, including Node.js/NestJS backends.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React, Next.js, Redux, Redux Toolkit, Zustand, TanStack Query, Tailwind CSS

Backend Familiarity: Node.js, NestJS (collaborative / integration level)

API & Communication: REST APIs, gRPC

Tools: Git, GitHub, Figma

Concepts: Component Architecture, State Management, Performance Optimization, Responsive Design, Role-Based Access Control

EXPERIENCE

Freelance Front-End Engineer — Remote

2020 – Present

- Developed and maintained production-ready web apps across e-commerce and workflow-management systems.
- Designed reusable, scalable component architecture adopted across multiple client projects.
- Optimized rendering performance by reducing unnecessary re-renders and refining component structure.
- Managed global application state with Redux and Redux Toolkit in medium-scale applications.
- Integrated REST APIs and handled asynchronous data flows with robust error handling.
- Partnered directly with clients to gather requirements and ship iterative improvements on tight timelines.
- Followed Git best practices — feature branches, pull requests, and code review.

SELECTED PROJECTS

Karinahub — Freelancing & Bidding Platform

Tech Stack: Next.js, NestJS, TypeScript, Zustand, TanStack Query

- Built a two-sided freelancing marketplace where entrepreneurs post projects and freelancers submit bids for review.
- Implemented separate role-based panels for Entrepreneurs, Freelancers, and Admins, with Admins overseeing both roles.
- Developed the front end in Next.js/TypeScript, integrating with a NestJS backend for bidding and role-permission logic.
- Used Zustand for lightweight client-side state and TanStack Query for server-state caching, data fetching, and sync.

ShopFlow — E-Commerce Web Application

Tech Stack: React, Redux Toolkit, Tailwind CSS

- Built product listing, filtering, and cart functionality for a full e-commerce flow.
- Implemented scalable global state management architecture.
- Optimized performance and ensured full mobile responsiveness.

GitHub: <https://github.com/mehdi-filban/shopflow>

Internship & Project Workflow CMS (University Project)

Tech Stack: React, Redux, Tailwind CSS

- Designed and built a custom CMS from scratch, including a dynamic form builder with validation logic.
- Implemented role-based access control for Admin, Supervisor, and User roles.
- Built a submission-tracking and approval-workflow system with a responsive monitoring dashboard.

Portfolio Website

Tech Stack: React, Tailwind CSS

- Built a performance-focused personal portfolio to showcase production-ready projects and UI skills.

EDUCATION

Bachelor's Degree in Computer Science

Asaryan University
